

3.1 STANDARD FINAT TEST ROLLER

Performance requirements for this test roller are that it applies a standard pressure irrespective of the variation in hand pressure on the handle.

Specifications

Diameter of roll:	mm 85 ± 2.5
Roll cover: rubber to hardness scale	Shore A 80 ± 5
Width of roll:	mm 50 ± 1
Weight of roller:	kg 2 ± 0.05
Rollers made to the earlier specifications 92-98 mm diameter are still acceptable.	

3.2 AUTOMATIC ROLLING DEVICE

The FINAT automatic roller unit ensures correct guidance of the contact roll and electronic adjustment of the rolling speed. The number of roll movements can be set at between 1 and 9 by a selector switch. The roll can easily be taken from its mounting. Rolls to other standards can also be used. The roll can also be safely lifted from the substrate in the end position.

Technical data

Roller speed 3 levels 5, 10, 200 (± 1 %) mm/s
 Length of roll area adjustable max 300mm Mains connection 220 V/50 or 110V/60

Roll data

Diameter:	mm 85 ± 2.5
Width:	mm 50 ± 1
Weight:	kg 2 ± 0.05
Hardness of rubber surface:	Shore A 80 ± 5
Thickness of rubber layer:	mm 6 ± 0.5
Rolls can be supplied to other standards	

3.3 TEST EQUIPMENT MANUFACTURERS

Test equipment is available in a wide variety. A number of manufacturers of such equipment is listed below, where possible with an indication of the type of their equipment. Please note that the list is far from complete and that it may be subject to change. We advise you to consult the websites of the respective manufacturers for more details and updates.

Company	Country	Test equipment	Page
ABB	Switzerland & Worldwide	pulp & paper testing (Lorentzen & Wettre Products)	84
Adhesive Technical Services Ltd.	United Kingdom	adhesion	84
Ametek Inc.	USA & Worldwide	adhesion	86
